Vision and Mission

The vision of the Forestry Agency of Central Kalimantan Province for forestry development in the timeframe of 2016-2020 is:

***"Fair and Sustainable Management of Forest Resources for
Community Welfare and Environment Sustainability"***

In order to materialize the above vision, several missions of the Forestry Agency of Central Kalimantan Province were established, namely:

1. To stabilize the status of forest areas and the quality of forestry data and information.
2. To improve the management of forest resources and sustainable utilization of forest products for people's welfare and business justice for local communities.
3. To stabilize efforts to protect and safeguard forests and forest products as well as to conserve natural resources.
4. To maintain and enhance efforts to rehabilitate forest and land in order to improve the function and support capacity of watershed areas.
5. To stabilize the institutional implementation of forestry governance in Central Kalimantan and improve the competence of human resources in support for the optimal implementation of forest management.
